Re: RESULTS Information Submission Specifications – Licensee Submissions

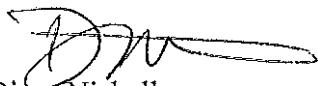

I am pleased to announce the publication of the *RESULTS Information Submission Specifications – Licensee Submissions* (RISS-ls) 4th Edition – May 2015.

The Minister has delegated me the authority to specify form and manner of silviculture reporting under the *Forest Planning and Practices Regulation* (FPPR) Section 86(6) and the requirement for forest cover inventory under FPPR s. 1. These specifications and requirements are outlined in the RISS-ls.

Revisions have been made to the current document in response to input received by the Coastal Region Implementation Team (CRIT) and by users via the NRS Service Desk and Resource Practices Branch. **As per direction from the Deputy Minister to make basal area a mandatory requirement, Section 5.7.2.2 has been amended.** Other minor revisions have been implemented in order to increase clarity.

RESULTS users are invited to provide on-going feedback that will be considered and addressed through periodic revisions of this document.

Please direct RESULTS business related questions and feedback about this publication to Caroline MacLeod (250) 256-2094; Caroline.MacLeod@gov.bc.ca or Paul Rehsler (250) 387-8627; Paul.Rehsler@gov.bc.ca.

Diane Nicholls
Chief Forester
